

“I wish every teacher
could have one—what
a difference in student
learning!”

Cindy Hasselbring
WINNER, PRESIDENTIAL AWARD FOR EXCELLENCE
IN MATHEMATICS AND SCIENCE TEACHING

Equip your classroom to meet today's students where they are now—as digital natives and high-tech learners—and prepare them for the future with comprehensive, collaborative tools that inspire teaching and learning success.

The Walk-and-Talk interactive whiteboard offers teachers remote control flexibility not available anywhere else. With the writing surface of a whiteboard, the control of an interactive computer screen, and a photographic memory, the Walk-and-Talk interactive whiteboard helps teachers bring learning to life.

PolyVision®

a steelcase company

bring learning to life™

Educational edge

With the Walk-and-Talk interactive whiteboard, you can:

Bring your existing web resources and software tools to life. Add class notes, sketches and drawings. Save them digitally and distribute to your students or parents. Use customizable RM Easiteach® curriculum tools to create virtually unlimited lessons and activities. Expand your teaching toolbox with a multimedia library packed full of images and flash activities.

Inspired teaching

All manufacturers claim their boards are easy to use. The Walk-and-Talk interactive whiteboard actually is, even for beginners. Operate the touch-sensitive surface with the stroke of a stylus or tap of a finger... advance slides via remote control from anywhere in the room.

No software to learn

True plug-and-play capability allows teachers to power up and begin teaching immediately. Relax! No special training required.

Works with your favorite tools

Including web browsers, Microsoft® PowerPoint® and Excel®, The Geometer's Sketchpad® and more.

Grow your technology expertise as you go

RM content tools, sample lessons and activities are included for use as your comfort level increases.

Interactive classroom

Put the active in interactive. Remote control gives you the power to engage all students and provide individual assistance. You can pace, roam, patrol—nothing ties you to the front of the room.

Capture and save

Print, email or upload all your notes—for easy access and distribution of lesson content.

Connect and go

With PolyKey™ technology, a convenient USB driver makes any computer—teacher's or student's—whiteboard-ready.

Defy wear and tear

The board's heavy gauge powder-coated aluminum frame and metal mounting brackets are strong, stable and durable. The Teflon®-coated writing surface is virtually indestructible.

See clearly

Give every desk the best view—PolyVision interactive whiteboards have the lowest surface gloss on the market for bright, clear images.

eVision™ PolyVision is committed to move toward sustainability in all areas of environmental stewardship—to protect people, replenish natural resources, and restore the communities in which we work and live.

Intuitive learning

Included with the board, RM Easiteach educational software adds dimension and flexibility to lesson plans. Content tools bring science, math, geography and language arts to life.

- Increase student involvement and understanding with visual and animated models to represent complex concepts
- Select from more than 2,000 images to develop creative lessons and activities
- Save time with user-friendly content tools

Combined with the Walk-and-Talk interactive whiteboard, the Qwizdom® student response system lets you assess retention and comprehension as often as you like.

- Adapt lessons to learning needs
- Increase student participation
- Confirm student understanding

Options

Get greater performance by opting for the following:

Lightning™ one-touch calibration technology

No more tedious, time-consuming calibration—just press a button and the projected image on the whiteboard is realigned immediately.

3M™ Super Close Projection System

Focus on your students rather than the bright light of the projector with the 3M short-throw projection system. Move freely without casting a shadow. Use built-in speakers to make audio lessons sing.

Power and Data Track

Enhance the front of your classroom and increase the available writing space. Mount the board over a traditional writing surface on the sliding Power and Data Track and power cords disappear from sight.

Bluetooth® communication

Sync up the computer and whiteboard from anywhere in the room, no cables involved.
