

PROJECT PROFILE

FIRM

Hollander Group and
Good & Roberts

CLIENT

NuVasive

YEAR

2020

LOCATION

San Diego, CA

INDUSTRY

Lifesciences

NuVasive develops medical devices and procedures for minimally invasive spine surgery.

NuVasive added a state-of-the-art Amenities building to their HQ campus in Sorrento Valley. The Amenities building is considered a high-profile facility on campus and they wanted to provide high-end audio-visual integration throughout the space as well.

This project was competitively bid and bkm designed and won the audio-visual integration.

SCOPE OF WORK:

- 2 Floors
- 23 Rooms

NuVasive had previously worked with the country's largest audio-visual integrators but selected bkm for our comprehensive in-house capabilities. Divisible Spaces, Conference Rooms, Training Room, and Digital Signage systems were all well executed using only the best manufactures including; Crestron, Biamp, and Samsung.

CLIENT FEEDBACK:

"bkm provided excellent customer service during our most recent TI. Their team was knowledgeable, communicative, and flexible and helped us to define the scope of work for our space. Paul, Adam, Tommi, and Joe made themselves available anytime to answer questions and ensure the AV project went smoothly. Once the AV scope was complete, Tommi and Joe spent ample time with our teams to ensure they were adequately trained on the new systems. bkm has been an excellent vendor to work with, and I would highly recommend them."

Johnathon Caradonna
Sr. Facilities Project Manager, Facilities
NuVasive, Inc.
